

INSTRUCTIONS -

Use with Big Bright Star Instructions. Acrylic template also available for purchase.

To use as paper template:

READ all instructions below:

- 1) Download and save this file to your computer - this will help make the size accurate. Print out on paper or cardstock using the setting "actual size". Check the measurement of the dashed lines - it should measure 4.5" x 10.5". If measurements are correct, cut along the dashed lines of the rectangle shape.
- 2) Cut out the diamond shape with an exacto knife or rotary cutter.
- 3) Lay the rectangle over the area you wish to fussy-cut. Center the image as you wish. Cut around the template rectangle edges (dashed lines). Tip: Cover the paper template with a ruler so as to not cut the edges away.
- 4) Use the fabric rectangle that you cut out as you would any other fabric piece following the regular instructions for Big Bright Star. The Top of the template says "template top". Position that end to the top of any of the first rectangles and to the left, right side down of any of the others. Try it before you sew - position and fold down along the sewing line.

OPTION: May be traced to stencil plastic.
